Changelog: - Fixed a crash bug in the app if more than one user has the application open. - Fixed the command to remove the last Waller image. - Added a "Show Waller" button on the main menu. - Added an option to change the time delay between Waller changes. - Added a configuration option to allow users to add users to the list of subreddits that Waller will download images from. - Added an option to allow users to show their Instagram, Twitter and Foursquare statuses on the user list. - Fixed a crash bug in the app. Protection of prolactin-induced decidualization by zinc. Zinc uptake has been demonstrated in the decidua of human pregnancy, and recent studies indicate that Zn can modulate the endocrine functions of the decidua during pregnancy. We have reported that treatment of ovariectomized rats with subcutaneous Zn can induce estrogen-dependent prolactin synthesis by the anterior pituitary gland, and that prolactin may induce decidualization in the rat. The aim of this study was to determine the effects of Zn 09e8f5149f

Waller is a lightweight and easy to use application that lets you create Reddit desktop backgrounds with a few clicks. A list of the most popular subreddits is available, but you can also add one manually. Users can set the time delay between background changes. Waller was designed with a minimalistic interface that makes it easy to use. Waller was the Reddit Desktop Wapper before the main reddit app. Waller is the #1 reddit desktop wallpaper tool. Waller downloads images in reddit order. Waller supports popular subreddits like r/programming, r/gaming, r/cars, r/movies, r/photography, r/travel, r/food and many others. Redditor » Waller was the reddit desktop wapper before the main reddit app was made available. This one is just about the size of the old in-browser reddit.com widget. Everything's here: upvote, downvote, reply, create subreddit, send direct message, subscribe to all posts, unsubscribe, comment, view comments, photos and like this,

What's New In Reddit Waller?

Wallpapers on your Android Phone! Reddit Waller is a lightweight and easy to use application that can download images from a list of user-defined subreddits and set them as your desktop wallpaper. A list of the most popular subreddits is available, but you can also add one manually. Users can set the time delay between background changes. Uses the new view mode. WHAT'S NEW 2.0.2 - bug fix That's it, enjoy it! Subreddit Mapping Do you like to upload images to subreddits and then like /r/wallpapers? Reddit Waller lets you download wallpapers from different subreddits and even import a text file with the name of a subreddit and an image path. Subreddits are parsed through the Reddit API (www.reddit.com/dev/api). For every subreddit in the list, a download request is sent with the image name as a parameter. The image is downloaded by Reddit Waller and is saved into the images folder. Please note that your phone needs to be rooted or have modifications to work with Reddit Waller. The application constantly scans for new (popular) subreddits to download wallpapers from, but this process can take a while. Subreddit Waller is not affiliated with Reddit in any way. Reddit Waller is also not affiliated with the app "SETWallpapers", which provides a similar feature. Subreddits installed SickBoy5289 PROTIP (Protip Recruitment) ChiefBlackDumpOnSociety SickBoy5289 PROTIP (Protip Recruitment) ChiefBlackDumpOnSociety Subreddits Right now the list of all popular subreddits is really big and includes subreddits with many thousand posts as well as the most interesting lists with up to tens of thousands of posts. I will add subreddits manually if they get more popular. TIMEFRAME You can set the time interval for which Reddit Waller will check subreddits for a new wallpaper: 0 = checks every 24h 1 = checks every 8h 2 = checks every 24h Subreddit Waller Features: - A list of subreddits - Download new images - Download images for subreddits - Choose which subreddits to download wallpapers from - Choose the distance in seconds between wallpapers - You can select which image size to use - You can choose which image dimensions to use - You can choose your wallpaper resolution
