# Tone Projects Sonitex STX 1260 VST V1 5 ASSiGN 15

---

Khordad 15, 1385 AP. It is available for PC with VST and costs \$49. A trial version will be available soon. Sincerely, Rune  
EDIT: OtiumFX is now called Tone Projects... but as always, it's a great choice for those who are trying to get the best possible recordings for their budget. It is available for PC, Mac and mobile platforms. There is also a selection of plugins that seem to be aware of the sound formats I need. It costs 60 dollars. I can't help but think it's worth it if you want to be able to record tracks that can be easily converted to other formats. Regards, Rune  
EDIT: This is very cool.
