Agora Movie A historical drama set in Roman Egypt, concerning a slave who turns to the rising tide of Christianity in the hope of pursuing freedom while falling in love. Q: Alternative to if else for this type of structure? I'm currently doing a little bit of cross platform development and in order to reduce the code I'm writing I am trying to shorten my if statements. There is one problem though, I have something like: if (((GameObject)meshes).has(placement.name)) { texture = ((GameObject)meshes).get(placement.name); surface = GameObject.make("surfaces/placement_01", new Vector2(0, 0), texture, placement.x, placement.y); if (surface.has("Face6")) surface.get("Face6").x = placement.x; } There is two gameobjects with unique textures, when I do the above it will only update the correct one. This can be easily solved if I just add an else statement, but this is not a solution I'm looking for. Is there a way to short circuit this without using an else statement? Thanks! A: I just changed the code to: if (((GameObject)meshes).has(placement.name)) { texture = ((GameObject)meshes).get(placement.name); surface = GameObject.make("surfaces/placement_01", new Vector2(0, 0), texture, placement.x, placement.y); if (surface.has("Face6")) surface.get("Face6").x = placement.x; } else { surface = GameObject.make("surfaces/placement_02", new Vector2(0, 0), texture, placement.x, placement.y); surface.get("Face6").x = placement.x; } 570a42141b
