EnjoyDora has a name and isn't afraid to use it. As a child, she didn't use to be shy. In fact, she often got into trouble for fighting back, often for talking back to her teachers and mom. On top of that, she didn't really like to go to school. So her mom decided to do the unthinkable — get her braces. “When I went to get the braces she would often stop me from saying ‘No’ or ‘I don’t want this,’” Dora told TODAY Parents. “But I remember clearly saying to her, ‘I am not a small child. I am 8 years old, and I don’t have to wear these braces.’” After Dora’s mom spoke up, she decided to get the braces off. She didn’t

want to be teased any longer. “It actually took quite a few weeks to get them off,” she said. Dora was eventually given the OK to move on, but that didn’t mean she was out of the woods. “[One] day I came home from

What's New in the?

New area clip tool: The area clip tool allows you to grab or sketch with your mouse over an area of a drawing to define it. This allows you to accurately select the objects you want to edit. (video: 2:00 min.) Improved component coordinate system: AutoCAD component coordinate systems now integrate well with the move tool. When you select a component or a sub-component using the move tool, it automatically centers the component in the coordinate system.

(video: 1:26 min.) Use the coordinate system to create custom coordinate system contexts. (video: 2:12 min.) Background task improvements: You can now easily define custom filters to automatically run in the background of your drawing window. Add-in Manager improvements: Add-in Manager makes it easier to use and manage your add-ins. The Add-In Manager now provides a workflow to help you manage your add-ins, and make changes to them quickly. (video: 2:13 min.) Revision differences: Differences between two revisions of a drawing, or even between a revision and a local change, can help you locate errors and code changes in your drawings. Added support for AIPS drawings. Improved support for CAX4D drawings. Added support for sub-document-

level table changes in table text files. Added support for DICOM, STEP, GDF, and eXtensible mark-up language (XML) files.
