Players have the ability to set-up and conduct the on-field actions themselves, or enable the game to predict and use the on-field actions that they would use in real life. FIFA's team of leading football experts worked with research specialists to create a new AI system that uses intelligent behaviour and on-field variables to simulate player actions. New crowd control makes crowds more dynamic and interactive, creating a more realistic on-pitch environment. FIFA Player Ratings FIFA continues its commitment to create the highest quality game by revamping the goalkeepers, defenders and midfielders, as well as introducing new and improved versions of its trademark Player Ratings for the attacking, attacking midfielder, defender, playmaker, center forward and wing forward. Highlights of new features:

- New AI (Artificial Intelligence) creates opponent behaviour that is unscripted and unpredictable, and new AI-controlled "crowds" become an integral part of the action.
- Keepers have been carefully evaluated, and playmakers now tackle more like an attacking midfielder than a traditional playmaker.
- Defenders handle possession better and are more "football-smart." They also have more direct vertical runs in the defensive phase, making them more threatening going forward.
- Midfielders and forwards are now more polished and perform a greater number of intelligent passes. The impact of passes in the offensive phase has been improved. Players now pass with greater accuracy and velocity, and crosses are more effective.
- The ball handling and ball control of each category of player has been improved.
- Players are more able to anticipate and react to on-field situations.
- In-depth opponent AI creates greater variety and unpredictability in opponent set-ups.
- Scoreboard contextual information, such as shots, can no longer be hidden.
- New user interface features in the Team Management mode allow for smoother and more intuitive control.

In-game Interviews FIFA introduced in-game interviews. These feature authentic, comprehensive, player-focused interviews where players discuss their on-field life, their relationship with FIFA and its fans, and their thoughts on the game and the wider footballing world. In-game interviews have three length options:

- Standard (~60 seconds)
- Extended (~90 seconds)
